

# Software Developer | Accessibility Advocate

I am a completely blind New Grad Software Developer with experience at Vulcan Coalition. With experience in Full-Stack Architecture, AI/LLM Integration, and Data Engineering, I am currently seeking a software developer position in an organization that fosters growth, embraces diversity, and values individual potential equally.

## Skills & Technologies

Backend: Node.js, Express, Python (FastAPI, Django), PHP, REST APIs, Microservices, Firebase

Frontend: HTML, CSS, JavaScript (ES6+), React, Tailwind, Bootstrap, Responsive, Accessibility (a11y)

Database: MySQL, PostgreSQL, SQLite, MongoDB, Firestore

Cloud & Tools: Docker, Git, CI/CD, Vercel, Redis, Celery, Postman, vs code , gemini cli, Antigravity, jira, GCP

Data & AI: Pandas, NumPy, Scikit-learn, NLP, LLM Integration, Recommendation Systems

## Experience

Software Developer Intern | Vulcan Coalition | Dec 2025 – Feb 2026

- Chrome Extension OCR & Firebase Backend: Replaced traditional OCR with an LLM-powered Chrome Extension. Architected a centralized, secure Firebase Functions backend with JWT auth, rate-limiting, and Secret Manager.
  - Technologies: JavaScript Firebase Functions, Firebase Admin, Axios, JWT, Mocha & Chai, Chrome Extension API
- API Monitoring & Alert System: Built an asynchronous FastAPI health monitoring platform tracking response metrics across multiple endpoints. Created a React/Vite dashboard using Recharts and integrated webhook alerts via LINE and Google Chat.
  - Technologies: FastAPI, React, Supabase, Docker, LINE Notify, Google Chat webhook, Tailwind CSS
- Stock Data Management Optimization: Reduced execution time from over 7 minutes to under 2 minutes by implementing data deduplication and batch processing.
  - Technologies: Google Apps Script, Google Spreadsheet API

Web Application Maintenance Intern | Suan Dusit University | Nov 2025

- Collaborated on a team of 5 on a PHP application to revamp usability, specifically optimizing Web Accessibility (a11y) for screen readers and engineering efficient frontend pagination logic.
- Technologies: PHP, HTML/CSS, Web Accessibility (a11y)

## Projects

Dynamic Review & Recommendation Platform (Graduation Project)

- Developed a Django-based review platform featuring a dynamically weighted hybrid recommendation engine combining Popularity-Based, Content-Based (PyThaiNLP/Word2Vec), and Collaborative Filtering models.
- Technologies: Django, Celery, Redis, MySQL, Docker, Pandas, NumPy, Scikit-learn, Gensim, PyThaiNLP, Bootstrap, Tailwind CSS, Chart.js

MERN-Stack Tarot Reading Platform

- Built a personalized, full-stack tarot reading application featuring single and three-card spreads, backed by a RESTful API and JWT authentication.
- Technologies: React, Express.js, MongoDB, JWT, Axios

Django Blog Platform

- Created a fully-featured blogging system with drafts, categorization, nested comments, and likes. Exposed all functionality via a comprehensive REST API.
- Technologies: Django, Pillow, SQLite

## Education

Suan Dusit University | Bachelor of Science in Computer Science, Faculty of Science and Technology (Cumulative GPA: 3.56)

## Contact Information

If interested or need more information Please contact me via the contact information below. Happy to participate in the interview and present additional work. Thank you. Phimwaree Thannirandorn
